About This Game

OVERVIEW

Carmageddon the original classic is back!

Carmageddon is the original freeform driving sensation, where pedestrians (and cows!) equal points, and your opponents are a bunch of crazies in a twisted mix of automotive killing machines. The game features anarchic drive-whenever-you-like gameplay and over-the-top surreal comedy violence. It's the racing game where racing is for wimps.

Now the same Mac & PC classic that was BANNED AROUND THE WORLD is back!

Carmageddon features real-world environments that have been turned into killing fields, where the locals stay out on the streets at their peril. As well as using your car as a weapon, every level is sprinkled generously with power-ups that have a vast variety of mad effects, adding a whole extra level of craziness to the proceedings. In every event you have the option to "play it your way"... Waste all your opponents, kill every pedestrian, or (perish the thought) complete all the laps. Oh and watch out – the cops in their super-tough armoured patrol vehicles are lurking, and if they catch you being bad they'll be down on you like several tons of cold pork.

GAMEPLAY

Waste opponents, kill peds and complete laps

The aim is for the player to work their way up the ranking system, from 99th place to first. The player vehicle is pitted against a number of computer controlled competitors, in locations such as cities, mines and desert towns. Levels can be beaten in one of three ways:

- Completing all the laps of the race course, as one would a normal racing game.
- "Wasting" (wrecking) all the opponents vehicles.
- Killing all the pedestrians in the area.

Each level has a time limit, but more time may be gained by passing through checkpoints, collecting powerups, damaging/destroying the competitors' cars, and by running over pedestrians (with bonuses awarded for style).

These actions also reward the player with Credits, which can be used to make instant repairs or recover the car (after falling down a chasm, for example). They can also be used to upgrade Armour, Power and Offense stats in the Parts Shop between races. This is also the time to switch which car to drive if others have been obtained.

As well as opponents partaking in the 'race', some levels also contain a number of heavily armored Cop Cars, which will activate their sirens and hound the player when provoked. They can be attacked and destroyed, but do not count as opponents. A single "Super Squad Car" exists in one level, and it can be claimed if destroyed.

An Action Replay with multiple camera viewpoints is available at any point during a race.

HISTORY

Blast from the past

Carmageddon is the first of a series of graphically violent driving-oriented video games. It was conceived and developed by Stainless Games, published by SCi and released June 30, 1997 on PC & Mac. It was, and remains, a poster child for video game controversy. The controversy surrounded the game's central premise; that of earning reward for running down innocent pedestrians. The game was notable for its realistic and ground-breaking physics, and for its in-game action replay features. It was also one of the earliest examples of a sandbox 3D driving game, and may have influenced other later games including the Driver and Grand Theft Auto series.

ABOUT STAINLESS GAMES

Stainless was founded in 1994 by Patrick Buckland, a veteran of the games industry going back to the Jurassic period of 1982, and Neil Barnden, who used to have hair like a mammoth. A team of 8 worked on the original Carmageddon at Stainless, and 5 are still with the company today, although a couple of them are now kept manacled in a small padded room in the cellar.

Stainless Games now employs around one hundred mad, dedicated people of assorted gender, height and width. They can all be found dangling precariously from a small chalky rock just off the South Coast of England.

This game makes me happy <3 I Nominated this for the "THE WHOOOAAAAAAA, DUDE! 2.0" award!. I especially like how anything related to network play crashes this game. Game crashes when one player completes the last level of a chapter.. I'm very enjoyed it. Experience constantly ruined by game crash. Just 2 hours played got 4 crashes occurred. It's been 6 years still no patch (guess they never will) and tried all community solution still not can't fixed.. You want to see what Mad Max would be like if it were filmed by a 6 year old playing with his hotwheels?

What are you waiting buy the game for I didnt say it was this game that the hotwheels twas comparison too.. This game isn't easy to describe but i really do enjoy it and its steady development-

It has Building, Village management, Survival and Tower Defense aspects.

The World map is pretty awesome, you start with one village and expand from there to others, send caravans back and forth for things that are needed etc.. I really, REALLY want to reccomend this game - but I can't. Bear with me for an instant and I promise that this will make sense in the end.

The atmosphere is amazing. I really dig the retrofuturistic aesthetic of this game's world. The sound design is stellar and excellent graphics really do their job at immersing you into the game. The story and backstory seems to be solid so far and the environments are exceedingly (in a good way) interactive. Almost verything can be moved, nudged or toyed with.

BUT performance-wise the game is a complete mess. I know it is a very demanding game, but I have a pretty decent rig and yet still manage to run this game with major stuttering and unnaturally low FPS. "You should lower your graphics!", you might say. Well, the thing is that even if I put every graphical option at the lowest value possible it still stutters like crazy to the point where it's almost unplayable. I'm someone who rarely complains about performance issues in games and am quite lenient in letting these kind of problems get into the way of my enjoyment, but this is simply absurd.

Unfortunately due to those aforementioned issues I feel sad to say that I currently DO NOT reccomend this game. This is not in any way an attempt to bash the hard-working folks of Mindfield games, by the way. The game is amazing but I can't play it. I want to play it so badly but it won't let me.

I trust the developers to find a solution to those issues and I would be more than glad to change my review once they are fixed. But until then I'd advise against buying it.. TBH the game is boring as hell. That's the case when the game have 4 hours of playable content, but for some reason the author decided to copy absolutely the same dungeons several times . Also the balance is quite terrible. At the late stage you will just faceroll the game.. It's a charming enough adventure game where you must mostly find stuff to complete puzzles. The pacing is fast, the objects not too difficult to find, and the puzzles are easy enough to figure out how to do on your own, so you won't get bored or give up. However, gameplay mechanics are crude, and one area was kind of buggy - my mouse cursor kept stalling. The poor English translation also spoils the story. Chapter 1 was fun enough and it's free, but I wouldn't pay to play the other chapters.

The game itself is pretty good for what it is, but the bullets seem too flashy and this would probably cause epileptic seizures for some people. I can only play a couple of rounds until my eyes are exhausted. Also the 10k kill trophy would be better of as 5k.. awesome game.

- + many units
- + optional deck creation
- + swedish units
- + fun in multiplayer

- my frineds will not buy it.... There's not much to do in this game. Concept seemed really cool so i gave it a try. Now i remember why i don't play Early Access games anymore.

Needs way more content and stuff to do before considering a review of this review.. Pretty bland. uses alot of stock RPG maker parts, a generic "silent protagonist" to save time, and you know. lack of writing skills.

actual in game dialogue is like 50 total lines.

actul story dosent exist. hits you with the egeneric "main character is the cause of this" literally immediately after talking about a "heart of the castle" or whatever.

has some specially drawn scenes, like 3 or 4 of them. but they ALL look terrible. my favorite is how the final boss gets his own little intro image. and it looks absolutely nothing like his in game sprite.

literally copies the main castle map from The Fairy, The Succubus, and The Abyss. dosent even TRY to rearrange it any.

gameplay is okay, but to grind monsters(which youll never need to do since every enemy can be killed in at most, 2 hits. final boss included.) you have to leave the dugeon and return. game has no balance whatsoever, as soon asyou get tripple triad or whatever the hell its called, its GG. you win.

its an okay rpg maker generic low effort game. for free. ITS NOT WORTH PAYING FOR. THIS ISNT EVEN UP TO LAXIUS POWER STANDARDS.. Zi bezt gaime evarr LOI Kek Praiz zi san and ur suol wll be savd
