This game is AMAZING with its non-pixelated 2D air combat.

The controls are VERY cooperative and easy to use

i like it, you like it too.. This is a True Gem for JRPG and classic RPG lovers.
It has Amazing unique Story Line, great HI-rez sprites and Environment.

-Looks and Feels-

- *Very interesting characters with unique vibe to them.
- *The game graphically feels like FF8-FF9 quality level hand drawn environments.
- *Very steam punk setting, reminiscent of Xenogears mixed with Breath of Fire V :Dragon Quarter vibe.
- *Story Telling is pretty unique and interesting with world maps and continents being underneath or above eachother.
- *Very Hi-rez sprites and every but of text in the game is Completely Voice Acted

-Battle and Gameplay

- *Battles are smooth satisfying and dynamic.
- *Battles are set up in Real Time action bar filling up with 3 levels of strength.
- *Everyone shares the same Mana pool.
- *You will use a lot of Melee skills but Spells can be very useful
to cast spells you need to obtain cards through main story and sidequests.
- *Very rich in Side Quests and puzzles that reward you with a good perk or weapon.

-Cons

- *Some sounds in battle sometimes are off sync with the hit but Its only with 1 character you will use rarely.

Recommend this RPG gem to anyone who is a fan and look for a refreshing classic they might have missed.

So I got this game a while ago, because I thought it's a great idea to approach Shakespeare. I like his works the way they are, but this is (imho) a funny idea :)

This game might be a bit of a problem though, since it works mostly with its unique kind of humor. So one either likes it or... well, does not :]

I loved it!

And mostly because I had enabled the narration. That works awesomely. The different voice for each character, the way the author makes Hamlet look like an absolute idiot. Hilarious! xD

Still. Just sitting here and listening to the whole story was a bit dry, so it took me quite a while to get it done – not in the way of hours it actually took me, but more in the sense of sticking to it and getting done with it. Once I found something I could do while listening/playing the game, that worked great though.

And should add, that I don't think I would have had the nerve to figure out every achievement on my own, since I would have to go through every possible way and that idea was a bit compelling o.o

So even if I loved the humor and liked the game, it also had some downsides for me. But that is alright. I mean, I've seen Hamlet in a way I have never before seen him :D

. Very slow AI turns --- minutes on my machine, so games take forever.

But otherwise like the game.. HAHAHAAAAAAAA what a joke. That taught me a lesson not to buy vr porn for a LOOOOOONNNGGG time. its nowhere near ready for primetime, give it another 100 years.. This game is so bad, i want to like jump in the car and go all creazy iun the vechile!!! lets go very giodo videwo game. Soemtim i gt a litel eksited bedfuc of the things that efekt the game i n al the ways u uknow. A very original and funny game, I loved the prototype and the insult simulator, and this one is awesome as well, but it stinks of evil hamsters in the evening!. I never knew my computer could convert to linux in a matter of seconds. 0/10. I read some good reviews of this, and was interested in a short, scary game for the evening. The price was about that of a movie rental, so I was all aboard. I will say, I have no problem with the \$4 I spent, but I do have a problem with the 2.2 hours I spent. The game goes nowhere. There's no resolution. You get a vague text message on the Macguffin phone and then you're back at the title screen. You obviously do some things in order to get that far, but there's no real reason related to the horror to be doing it. There's one sequence where the game insta-kills you for making wrong turns (you have to basically Edge of Tomorrow your way through) that was so frustrating that I had to quit the game for a while. It just took me out of the entire horror of it, and rather made it just annoying. There were moments of brilliance, and I can see that the developer has some talent, so I will not be asking for a refund, I just have to say I'd rather not have spent my time on it.
