About This Game

The brand new helicopter game from independent developers Bohemia Interactive – creators of the award-winning military-Sim series Arma 2. Built upon over 10 years of experience in cutting-edge simulator development, Take On Helicopters immerses players within beautifully rich landscapes and an authentic flight model.

The player takes on the role of a civilian helicopter pilot. Harry Larkin's aviation business has fallen on tough times. Built up over decades, it's now only days away from closure. His sons face an uncertain future, struggling to save the company their father spent his whole life building. Together, they must take on contracts and competitors; together, they take on helicopters!

Take your first steps towards mastering rotor-wing flight across a massive range of enjoyable challenges, or create your own missions using the powerful easy-to-use mission editor.

Take to the air above two beautifully rich and expansive environments, based upon real-world North American and South Asian terrain-data.

Take on cutting-edge technology, helicopters modeled in stunning detail, a large-scale, open-world sandbox and authentic flight dynamics...

Take On Helicopters Offers:

- High fidelity flight dynamics modelling
- Richly modelled helicopters & cockpits
- Expansive & detailed environments

-
- Powerful & intuitive mission editor
 - Multiplayer – co-op & competitive scenarios

Take On Helicopters features two huge terrains:

- [Seattle](#), a 60x60km chunk of North America
- [South Asia](#), a 120x120km terrain populated with vegetation and urban structures.

Take On Helicopters introduces the player to three distinct classes of helicopter:

[Light](#)

[Medium](#)

[Heavy](#)

Title: Take On Helicopters
Genre: Simulation
Developer:
Bohemia Interactive
Publisher:
Bohemia Interactive
Release Date: 27 Oct, 2011

b4d347fde0

OS:Windows XP

Processor:Intel Dual-Core 2.4 GHz or AMD Dual-Core Athlon 2.5 GHz or faster

Memory:2 GB RAM

Graphics:NVIDIA GeForce 8800GT or ATI Radeon 4850 with Shader Model 3 and 512 MB VRAM or faster

DirectX®:dx90c

Hard Drive:20 GB HD space

Sound:DirectX 9.0c compatible audio-card

English,Czech,French,German,Italian

This is a broken piece of software that doesn't even start on full screen, when it does start, 10 fps on loading screen, menu UIs are clunky, control mapping is a nightmare at best, model rendering doesn't even want to go there and no support for years but this piece of software is still displayed to be purchased on Steam.

You implement some useless anti piracy stuff like "Users running an illicit copy of the game will find that its visuals degrade and blur as it's played." but do not care how your game runs? This is game visuals are degraded as it is. Jesus Christ.

Bought Arma 3 apex on sale last week not realizing it is from Bohemia Interactive and as soon as I realized who made that refunded it promptly.

This studio is dead to me forever.

Steam should make "Block Studio" menu FFS.
